Data Processing Digest

VOLUME 35, 1989

## 1989 ANNUAL SUPPLEMENT

## INDEX AND REFERENCE LIST

**Title Index** ..... 1
**Author Index** ..... 5
**Subject Index** ..... 7
**Periodical List** ..... 11

# INDEX

This is the annual index for DATA PROCESSING DIGEST for the year 1989, Vol. 35, Nos. 1-12. The index is divided into three sections: the list of titles as they appeared in the Digest, a list of authors, and a subject index. All articles have at least one subject citation. Italicized titles are books, periodicals or reports. The numbers following the entries indicate issue and pages in which the item is found. The number preceding the hyphen is the issue; the numbers following the hyphen are the pages.

### TITLE

About SPC, 4-11
Accurate Unix Benchmarking: Art, Science, Or Black Magic?, 2-13
Advanced Technology Groups, 1-25
AI In Manufacturing: The Balancing Act, 7-27
Aiming IS At Business Targets, 5-8
Anti-Virus Products—Some Questions Answered, 4-16
Application Planning: The Key To Network Success, 11-3
Applying Channel Extension Capabilities To Contingency Planning, 10-15
Applying Channel Extension Capabilities To Contingency Planning: Part 2—Applications, 12-3
Approaching Expert Systems, 1-21
Are You Ready For the Software Maintenance Decade?, 10-10
The Art Of Distribution, 4-2
*Artificial Intelligence Programming Environments*, 8-26
*Artificial Intelligence Programming With Turbo Prolog*, 3-20
Artificial Intelligence: The Ruby Slippers Revisited, 12-30
Assuring the Competency Of Computer-Generated Evidence, 9-22
Audit Staff Integration, 12-7
Audit Trails: Today's High-Tech/High-Touch Audit Challenge, 4-17
Auditing Computer Contracts: An Ignored Science, 1-17
Auditing the Data Security Function: A "Win-Win" Opportunity, 9-16
Auditing Physical Security In the Data Center, 7-16
Auditing and Testing Interconnected Networks, 10-4
The Auditor's Use Of SMF, 9-16
Automated Operations, 10-14
Automated Requirements Definition: Myth Or Reality, 7-12
Automating Data Center Operations, 3-11
Automation To Boost Sales and Marketing, 3-28

Backdoor LANs: How To Manage Unsanctioned Networks, 1-18
Bad Beginnings Make Bad Endings, 8-19
Bailing Out Information Resource Management, 5-8
A Basic Approach To a Capacity Planning Methodology: Second Thoughts, 1-15
The Basics Of Automatic Identification, 12-26
The Basics Of a Successful System, 4-25
Beating the Mainframe Upgrade, 7-7
A Benchmark Tutorial, 12-20
Benchmarking the Benchmarks, 11-10
The Best Of Both Worlds, 7-10
Besting Two Barriers To IS Planning, 5-9
Beware When the State Gets Your Software, 2-22
Big Blue's Database Is Only Part Way There, 2-20
Bits and Pieces At Year's End, 2-17
The Brewing Crisis In Project Management, 9-10
Business and Education: Forming New Partnerships, 7-26
*Business Programming Logic and Design*, 10-26

A Call For Better Tools, 3-1
Can Stand-Alone EISs Stand Up?, 9-19
Can You Loosen the Bolts Without Disarming the Locks?, 12-1
Can You Trust Your DBMS?, 10-13
Can Your Computer Go the Distance?, 9-12
Capacity Planning For Competitive Advantage, 3-22
CASE and the DBA: How the Tools Affect the Role, 3-5
CASE: An Industry In Flux, 2-1
A Case-Based Approach to Modeling Legal Expertise, 1-22
CASE: Clarifying Common Misconceptions, 7-20
CASE For Existing Systems: Taking Yesterday's Systems Into Tomorrow, 1-15
A Case For New Technology, 5-20
The Case Of the Miracle Cure, 9-15
The CASE State-Of-the-Industry Report, 12-19
A Case Study: Acquiring Strategic Knowledge For Expert System Development, 2-18
The CASE Template, 7-22

CASE Tools: Catalysts For Change, 8-4
A Catalyst For Open Systems, 8-22
Catching Runaway Computer Systems Before They Bolt, 12-10
CD-ROM Enters Mainstream IS, 8-18
Change Control and Configuration Management, 8-6
Changes That Are More Than CPU-Deep, 8-9
Changing the Fixtures In the House That IS Built, 9-3
Changing the IS Mission, 9-2
Chargeback Systems Come Of Age, 1-10
Charting a Safe Course To Systems Integration, 6-15
The Chief Information Officer As an IS Architect, 7-4
Choosing an Image Strategy, 2-23
Choosing PC Software For Decision-Making, 3-3
CIO Challenges In the Changing MIS Environment, 9-2
Cleanroom Used On COBOL/SF, 10-11
The Coming Revolution In Interactive Digital Video, 9-20
Common Sense and VDTs, 1-10
Compensation In the MIS/DP Field, 6th Edition, 7-7
Competitiveness: A New Standard, 9-22
Complex Tasks, Higher Powers, 7-14
Computer-Aided Medicine: Present and Future Issues Of Liability, 10-18
Computer Integration Means Aiming Higher Than Mere Networking, 9-12
*Computer Literature Index*, 8-25
*Computer Logic: Principles and Technology*, 3-29
Computer Viruses: Controller's Nightmare, 12-4
Computer Viruses: New Potential Liability For Software Developers and Expert System Providers, 7-24
Computing As a Discipline: Final Report Of the ACM Task Force On the Core of Computer Science, In Cooperation With the IEEE Computer Society, 4-26
The Connectivity Audit, 10-16
Connectivity: The Promises and Pitfalls, 9-13
Console Automation, 4-10
The Context For Information System Security Planning, 2-14
Contracting With Integrators, 8-9
Control Of Electronic Data Interchange Systems, 5-26
Control Of Software Prototyping Process: Change Classification Approach, 6-11
The Controlled Data Redundancy Test, 10-10
Controlling User Authorization In Relational Database Management Systems, 11-10
Controls In the Design Of End-User Systems—Part One, 5-28
Cost-Cutting, Revisited, 9-7
Courting Disaster, 12-12
*Crafting Knowledge-Based Systems: Expert Systems Made Realistic*, 9-25
Creating Computer Security Awareness, 8-12
CSI's Advisory Council—Taking Action On the Virus Problem, 2-15
CSP: The Weak Link In SAA?, 2-21
Curriculum Shortfall, 3-29
Data Bases—The Now and Future Kings Of Integration, 5-31
Data Center Depopulation, 2-12
Data Centers: Dropping Walls and Building New Identities, 4-5
*Data Communications Networking Devices: Characteristics, Operations, Applications*, 2-26
Data Verification and Review, 4-17
Database Liability: Some General Remarks, 8-12
Database Machines: The Least-Cost Route?, 1-20
*Database Processing: Fundamentals, Design, Implementation*, 8-25
Database Servers Are Changing, 8-17
Database Servers Arrive, 10-21
DBMS Comparison: Ingres & Informix & Pick, 1-14
Dealing With Mergers and Acquisitions, 5-6
Decentralization From the Head Up, 11-16
*Demassification: A Cost Comparison Of Micro vs. Mini*, 11-26
Departmental Computing: Which Way To Turn?, 3-16
Design Issues For Intelligent Microcomputer-Based Decision Support Systems, 6-22
Designing as Development Methodology, 1-3
*Designing Information Systems Security*, 9-26
Detecting Computer Viruses, 6-23
Determining Economic Feasibility: Four Cost/Benefit Analysis Methods, 12-9
Developing Applications With OS/2, LAN Manager, and SQL Server, 8-17
Developing Databases With APGENS, 2-5
Developing Good Data Definitions, 11-11
Dialing For Help, 4-25
The Difference Between Conservation and Cutoff, 7-5
Disaster Avoidance, Contingency Planning and Disaster Recovery—The Vital Three-Prong Program, 2-16
Disaster Prevention and Recovery, 5-22
Distributed Data Processing: New Problems, 1-17
Distributed Database Development, 2-6
The "Do More With Less" Guide To Existing Systems, 5-28
Do Your Applications Fit Your Platforms?, 4-4
Document Delivery Systems: Revisiting the Paperless Office, 4-22
Document Imaging: The Right Fit?, 12-25
Does Your Hot-Site Back-Up Facility Have Sound Contingency Plans?, 7-9
Do's and Don'ts For Personal-Computer and Terminal Users, 2-19
DOS To MVS—Four Ways To Manage the Challenge, 12-13
Downsizing an Opportunity and a Risk, 3-17
The Dual-Protocol Modem Duel, 5-30
Dynamic Passwords: The Key To Effective Computer Security, 3-23
A Dynamic Process: West Is Changing the Way Legal Research Is Done, 2-23

The Economics Of Capacity Planning: Where's the Payback?, 12-20
The EDI Dilemma, 4-1
EDI Implications for Security and Audit Controls, 10-3
EDI In the OSI Architecture, 8-16
EDI Integration: Translation Software Options, 1-24
EDI Yellow Pages Directory, 8-17
EDI's Effect On Internal Controls, 10-3
Editorial, 10-14
Editorial, 12-25
*The EDP Performance Management Handbook*, 9-24
Effective Project Management Guides Successful IS Development, 7-3
EFTS International Networking: Addressing the Global Security Problem, 1-19
88Open: The Software Initiative White Paper, 9-19
Eight Steps To Applications Engineering, 1-2
EIM: Electronic Image Micrographics?, 7-30
Electrical Disturbances and Computer Protection, 4-5
Electronic Data Interchange (EDI)—Implementation and Control, 6-20
Electronic Data Interchange Symposium, 11-20
Electronic Document Management: Part I, 7-29
Electronic Document Management: Part II, 8-18
An Emerging Standard For CIM Data Sharing, 10-22
The Emperor's New Clothes: IBM's Database Manager, 6-6
Employment Agreements That Count, 6-17
*Encyclopedia Of Information Systems and Services*, 3-29
*End User Computing: Management, Applications, and Technology*, 11-26
Europe 1992: The Impact Of Unification On Non-European Computer Companies, 9-19
Executive Support Systems Come Of Age, 12-24
Expanded Storage: A Generic Solution For Performance?, 5-2
Expanding the CIO's Role: Monitoring Competitors To Stay One Step Ahead, 9-1
Experiences With Work Group Computing, 9-8
Expert System For Selecting Expert System Shells, 4-13
Expert System Tools For Knowledge Analysis, 12-28
Expert Systems As Human Resource Management Decision Tools, 3-26
Expert Systems Development Strategies, 8-20
Expert Systems For Experts, 5-34
Expert Systems In Japan, 1-22
Expert Systems In MVS, 5-21
Exploiting Console Automation, 11-14

A Fast Track Approach To Computer Contingency Planning, 2-16
50 Questions To Answer For a Better I/S Payoff, 9-6
Fighting Corporate Amnesia, 4-6
Five Easy Pieces: Reframing the Design of Office Systems, 9-11
. . . For the Times (and SLCs) They Are A-Changin' . . ., 1-9
Frito Lays a New IS Bet, 5-12
From CASE to Software Factories, 6-5
From Chaos To Control: Configuration Management, 3-12
From Desktop To IC: The Recentralization Of Corporate Publishing, 12-14

From First Generation CASE To the New Generation Of CASE, 7-19
From LANs To WANs, 7-26
Full-Text Retrieval: What It Is and What It Can Do, 4-23
Future CASE: A Cozy Habitat For Developers, 7-21
The Future Of SQL, 6-7

## SUBJECT

Advanced Technology Groups (ATGs), 1-25
AI, 4-6, 8-20, 12-27
AI applications, 1-21
AI for computer security, 2-15
Analysis Assist system, 7-13
Apollo Network, 10-25
application development productivity, 2-4
application generators (APGENS), 2-5, 3-6
application platforms, 4-4
applications engineering, 1-2
artificial intelligence, 3-30; 6-21, 22; 8-26
artificial intelligence in banking, 12-30
Asia/Pacific telecommunications, 5-29
asset management, 11-17
ATAC, 4-18
audit checks on telecommunications control, 8-14
audit staff integration, 12-7
audit/test of complex networks, 10-4
audit trails, 4-17
audit use of SMF (System Management Facilities), 9-16
auditing computer controls, 1-17
auditing data security, 9-16
auditing EDI systems, 10-3
auditing EFT, 1-19
auditing networks, 10-16
auditing spreadsheet design, 12-5
audits of system implementations, 10-9
automated computer operations, 2-12, 4-5
automated joint application development (AJAD), 5-13
automated requirements definition, 7-12
automated operations, 4-10, 10-14
automated operator system, 11-14
automatic identification, 12-26
automatic teller machines, 5-27
automation in sales and marketing, 3-28
automation of data centers, 3-11

backup files and media, 5-24
backup for hot site, 7-9
back-up for PCs, 3-18
banking AI, 12-30
Bayesian networks, 8-20
benchmark standards, 4-10
benchmark tests, 11-10
benchmarking, 2-13, 12-20
biology applications, 6-26
Boolean logic, 8-20
Boston University automated datacenter, 11-14
business continuation planning, 6-23
business expert systems, 4-6
business-oriented IS management, 6-18

C, 2-25
capacity management, 3-20, 21
capacity planning, 1-15, 2-11, 3-22, 5-3, 6-13, 9-24, 12-20

capacity planning for networks, 10-15
CASE, 6-5, 7-21
CASE benefits, 6-3
CASE design templates, 7-22
CASE dictionary, 3-5
CASE implementation, 4-8, 9-15
CASE industry, 2-1
CASE next generation, 7-19
CASE payoffs, 6-3
CASE + JAD, 5-13
CASE:PM, 4-13
CASE technology, 2-7, 4-21, 6-18, 7-21
CASE technology and support, 12-19
CASE tools, 1-15, 7-12
CASE training, 3-4
CD-ROM, 7-29, 8-18
change control, 3-12
change control in prototyping, 6-11
change in MIS, 1-9
change management, 1-8, 24
channel extension for contingency planning, 10-15, 12-3
chargeback, 1-10
chief information officer (CIO), 7-4
Chrysalis, 4-6
CIM data sharing, 10-22
CIO strategies, 9-1
CIO success, 12-7
Cleanroom software environment, 10-11
client/vendor software alliance, 5-6
COBOL programming, 6-27
COBOL regeneration, 4-6
Common User Access (CUA), 4-13
communications standard X.400, 11-8
competitor monitoring program, 9-1
Computer Aided Design/Computer Aided Manufacturing (CAD/CAM), 4-19
computer-aided manufacturing (CAM), 5-32
computer-aided medicine, 10-18
computer-aided software engineering (CASE), 3-4; 7-20, 21; 8-4; 9-14
computer assisted legal research (CALR), 2-23, 24
computer contracts auditing, 1-17
computer crime, 10-1, 12-2
computer-generated evidence, 9-22
computer graphics, 6-25, 26
computer imaging in medicine, 11-24
computer integrated manufacturing, 10-22
computer integration, 9-12
computer law, 12-27
computer literature bibliography, 8-25
computer litigation, 12-12
computer network architecture, 2-26

## REFERENCES

The staff of Data Processing Digest regularly monitors an average of 150 computer, trade, educational, scientific, and business management periodicals for appropriate articles to digest each month. The list of periodicals varies widely from year to year, and even from month to month, as new periodicals appear, and others cease publication or change their editorial direction. Every June issue and the year-end annual supplement include all the publishers' addresses for your convenience. During other months of the year, only the periodicals referenced in that issue are given. All addresses which do not include a country are in the U.S.

Please request copies of originals from the publisher of the periodical. Do not write to *Data Processing Digest*, as we do not copy or reprint, and your request will be delayed. Books should be ordered from their publishers or from a local technical book store.
